DOPING:

It is forbidden to administer any stimulant, or depressant to a horse, or to cause one the administered, in anyway whatsoever, either before the start of the competition or on the previous day, under the maximum penalty of disqualification for life of the owner, rider, horse and groom. If during a competition, or after a test which forms part of a combined effort, it is necessary to treat a horse with a drug that is calming, anti-tetanus, fortifying, stimulating, etc, the Veterinary Surgeon appointed by the organising committee must be informed immediately. He will verify the expediency of the treatment given and then make a report to the Ringmaster, who will decide whether the horse is to be allowed to continue, or is to be eliminated.

All stimulating or fortifying treatments not considered necessary to the accredited Veterinary Surgeon and administered during or after a test, which continues on the following day(s), involves the compulsory elimination of the horse. If the treatment has been for colic only, the committee appointed to examine the condition of the horse (if there is one), decides before the beginning of the next test, whether the horse is in a fit state to continue or should definitely be eliminated. If there is no such committee, the decision rests with the Ground Jury.

The use of hormones, tranquilizers and/or analgesics is prohibited. The Ringmaster will deal with any exhibitor violating this regulation.

The Ringmaster may make or cause to be made any test of any exhibit to determine whether any drug or stimulant has been administered to such an exhibit and may take possession of any such exhibit for any of the afore said purposes and detain such horse for such a period as deemed necessary. Drug means any substance capable of affecting the performance or behaviour of a horse by its action upon the central or peripheral nervous system, the cardiovascular system, the respiratory system, the alimentary system, the muscular-skeletal system or the anti-genital system and shall include analgesics, anti-histamines, anti-inflammatory agents, blood coagulants, diuretics, hormones and their synthetic counterparts, cortico-steroids, anabolic steroids, local anesthetic, muscle relaxants and tranquilizers and vitamins administered by injection. Any exhibit that has been brought to the Show grounds and is found by a Steward to have had administered to it any drug as defined above might be disqualified from any event or class for which it has competed at the Show.

When any horse which is on the Show grounds for the purpose of taking part in a class or event at the Show is found to have had administered to it, a drug as defined above by the owner or any other person who was in charge of the horse, may be disqualified or otherwise penalised by the Association.

Any person who at any time administers or causes to be administered for the purpose of affecting the performance of a horse in any event or class at the Show, any drug as defined above or has in his possession any electric or galvanic apparatus or improper contrivance may be disqualified or otherwise penalised by the Association.

The Association and any Steward, servant or agent of the Association shall not be liable to an exhibitor for the death of or for injury, damage or infection which may be sustained by his/her exhibit occasioned by or arising out of any act or omission of any Steward, servant or agent of the Association during the course of the testing of the exhibit whether due to the negligence of any such Steward, servant or agent or otherwise.
